

NIAGARA

Professional water dispensers for large scale applications

Reliable technology and powerful performance make the Niagara range an **ideal partner in the distribution of drinking water within large groups of people.**

- Innovative solutions for drinking water**
An efficient, practical and economical alternative to traditional bottled water, which is also completely environmentally friendly!
- Unlimited water**
Up to 180 litres of cold, still and/or sparkling water can be dispensed per hour, thanks to ice-bank cooling and cold carbonation technology; this is ideal for large-scale users.
- Wide range, maximum versatility**
Available in three models – floor-standing, counter-top and under-counter – to fulfil various usage requirements.
- Filtration**
The taste and smell of the water can be improved by fitting filters capable of removing sediment and chlorine.

Recommended accessories

Waterblock
Prevents accidental flooding caused by faults in the water supply line

No shock
Absorbs sudden changes in the water mains pressure if an autoclave is fitted

Recommended filters

F-CAL
Anti-limescale bacteriostatic chlorine filter/purifier

F-MICRO
Antibacterial microfilter

F
4C chlorine filter/purifier with optional UV lamp, electronic water meter and electronic timer

NIAGARASL

A standard-bearer for practicality, efficiency and sturdiness.

-  **Hygiene**
Stainless steel dispenser casing and sink as standard, to guarantee maximum hygiene.
 -  **Dispensing**
Internal taps, protected from environmental pollution. Continuous or intermittent dispensing.
 -  **Maximum safety**
The safety valve prevents flooding caused by accidental faults inside the machine.
 -  **Functionality**
Space for housing the filtration system and the CO2 cylinder for carbonated water inside the machine; easy maintenance via the front opening.
- Plus-optional
-  **Electronic control**
for programming and monitoring functions.
 -  **Anti-bacterial UV system**
to protect the dispensing area.
 -  **Stainless steel shell**
Machine body entirely in AISI 304 stainless steel.

NIAGARATOP

Ideal for worktops, bar counters or canteens.

-  **Efficiency**
It optimises dispensing and eliminates bottled water management, offering the same high performance levels as the floor-standing model but in a smaller space.
 -  **Practicality**
The dimensions, and the depth measurement in particular, adapt perfectly to worktops in large and small restaurants.
 -  **Drip trays**
The brand new “quick-fit” system is used to secure the tray to the machine firmly.
- Plus-optional
-  **Electronic control**
for programming and monitoring functions.
 -  **Anti-bacterial UV system**
to protect the dispensing area.
 -  **Stainless steel shell**
Machine body entirely in AISI 304 stainless steel.
